EDGAR E. MATTESON, Collector.

WARWICK, R. I., November 21, 1905.

To the Tax-payers of the town of Warwick in Financial Town Meeting, assembled, Tuesday, November 21st, 1905.

GENTLEMEN:—Your Commission for the construction of a new high school building respectfully submits the following report:

With the reference to the site selected for the building, we desire to state that the location at Westcott was chosen, after most careful consideration of available sites within the Town, as being the best suited to meet the needs of the greatest number of scholars attending.

This task was a very difficult one on account of the unusually large area of the town and from the conviction of the members of your commission that a single high school building would suffice, only for a few years, to accommodate the increasing numbers of high school attendants in this large and rapidly-growing community.

Advertisements were inserted in several of the prominent newspapers of the town and state calling for offers of sites for the building, and as a result of this publicity one person, only, in the whole town, offered to denote a site. This gentleman was Mr. Robert Knight, who not only freely tendered a most attractive and easily accessible site, but in addition to this generous offer agreed to make a large cash contribution towards the expense of grading the grounds and putting the same in proper condition.

Your Commission recognized this location as being advantageously situated, as it is at the junction of two roads and on the line of two railroads and two trolley lines, being more accessible from all parts of the town than any other site that might have been chosen.

The plans for the building were formulated after a careful examination of the most modern and best examples of buildings of this type and cost in neighboring states, and represent, it is believed, a combination of the best ideas so gathered.

The building contains six regular class rooms, a commercial room, rooms for stenography and typewriting, chemical and

physical laboratories with storerooms in connection with each, a dark room for photographic work, an assembly hall, teachers' rooms, principal's office, reception room and library.

The basement provides space for two manual training rooms, locker rooms, toilet rooms, lunch counter, gymnasium and boiler rooms.

All contracts were awarded to the lowest bidders, all bills contracted for have been paid, and there remains an unexpended balance upon each appropriation, the total of said unexpended balances amounting to \$876 88.

Your Commission respectfully presents the following financial exhibit, showing the cost of the work:
